Inspire the Next

Hitachi Advanced Collaboration System

A novel meeting system that enhances competitive power

Hitachi Advanced Collaboration System

All participants express their opinions, invigorating the meeting.
This is the kind of novel meeting style Hitachi Solutions is creating.

Hitachi Solutions

The first step is changing how you conduct business meetings.
Gain competitive power and advantage to successfully compete in the global marketplace.
Hitachi Advanced Collaboration System

Since social and economic environments are changing at breakneck speed, there is a demand for keeping up with the day-to-day changes. Cost reduction is not the only business challenge companies now face.

Accelerate Innovation

Globalization Support
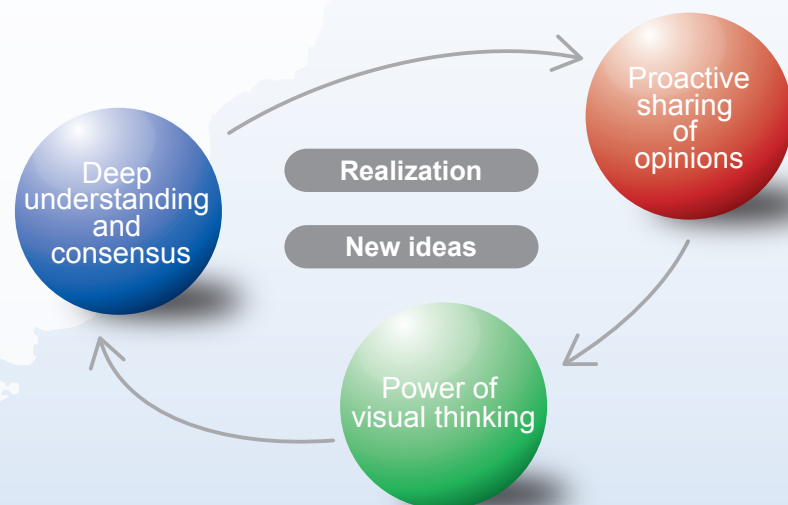

Creation of new value

Collaboration with remote locations

There is a need to gather the knowledge of skilled employees located in global locations, and establish an environment that encourages new and sustainable value creation.

With the belief that the meeting room is one place to create value, Hitachi Advanced Collaboration System is a novel meeting system that allows all participants to work toward same goal and proactively express their opinions, making lively and creative discussions possible, whether in the same conference room or remotely located. Using interactive whiteboards, PCs, and tablet devices*, the system supports collaborative work in the conference room, scattered workplaces, and telecommuting locations.

* Windows OS is supported. iOS/Android support is planned.

Hitachi Advanced Collaboration System creates a positive growth cycle for value creation on a global scale.

Proactive sharing of opinions

Realization

New ideas

Deep understanding and consensus

Power of visual thinking

Transform meetings into ideal collaboration sessions

Hitachi Advanced Collaboration System main functions

Utilize the whiteboard and collect your thoughts

Document sharing and editing stimulates communication

Sticky notes help generate ideas

HITACHI ▼ HITACHI
Automatic handwriting recognition cleans up notes for legible meeting notes

Get involved in a discussion with a simple call

Share your whiteboard and discuss while seeing the face of the other party

Two whiteboards, local and shared, enable smooth information exchange

* Windows Vista/7/8 are supported.

Hitachi Advanced Collaboration System can also be used in the following situations:

Marketing/ planning	Research and development	Design	Field support	Disaster planning (BCP)	Corporate training
New product development discussion and brainstorming	Information sharing and exchange of ideas with colleagues abroad during joint development and research	Drafting/design document sharing	Remote assistance through giving work orders to maintenance staff and providing maintenance documents	Sharing of disaster site situation in real-time, which enables quick countermeasure instruction and on-site response	Group work is possible using sticky notes and a whiteboard

Results
● Trigger new ideas ● Reduce time-to-market

Results
