

HIBUN

Data Leakage Prevention Solution

HIBUN Data Protection

"Trace" data file wherever goes

"HIBUN Data Protection" traces files provided to business partners and stop reference of files to prevent data leakage.

Feature

Protect secondary use of data

Detect the sign of data leakage and notify to administrator

Expire access to data files

HIBUN Data Protection

HIBUN

Expire access on files to stop further data leakage

File protection and stopping reference function prevent files from unauthorized copy and data proliferation.

Protection

Viewable HIBUN confidential file

Prohibit edit, print, copy and print screen of the file and permit view only to control secondary use of it.

Detection

Detecting the first sign of data leakage

Notification email is sent to the administrator when suspicious operation is detected, such as certain number of typing the wrong passwords. The administrator can check the location where the data file are accessed on a map.

Expiration

Expiring access to files to prevent data leakage

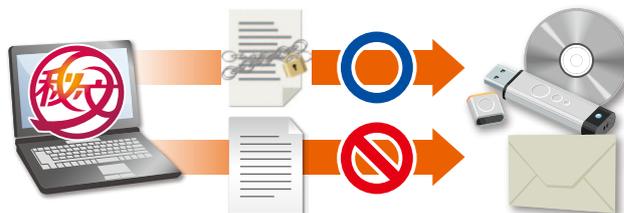

Viewable HIBUN confidential data file can be expired by the owner even after the file is already provided.

Solution with lower initial cost

Server function is provided as a cloud based service and the server implementation is not required.

Integrating with other HIBUN products will enhance and expand your security level.

HIBUN "Three forces" resolves complex security issues.

Security risks in the IT environment are sophisticated and diversified with current compound uncertain and boundary blurring situation. HIBUN three forces "Regulate", "Encrypt" and "Trace" surely resolves complex security issues.

Regulate

Encrypt

Trace
